

Specialists for Life

The Support and Expert Center for persons with Intellectual Disability

- **The Special Welfare District of Southwestern Finland**

The medical, social and educational experts of our center examine and rehabilitate persons who have problems in their daily living because of special needs due to intellectual disability. We are owned by our municipalities and we support the local offices' work.

We provide a wide variety of services for individuals with intellectual and developmental disabilities of all ages, such as:

- Assisted living services
- Short term special care services including facility based respite care, evaluation and rehabilitation services, psycho-social evaluation and habilitation services
- Long term residential care services
- Relocation training
- Structured day and recreation services
- Home based special family support services
- Specialty health care services, developmental evaluations and follow-up services for home and community based rehabilitation as well as consultation services.
- Special education and post-secondary/pre-vocational training and habilitation
- Employment opportunities and day habilitation
